14. Once all the payment methods you want work with the new Shopify App for PostFinance Checkout, you can delete the old integrations via your Shopify dashboard.

### Important note:

If there are problems with the on-site credit cards ("Pay with Card Onsite"), the Shopify checkout must first be updated. After uninstalling all old integrations, the update takes place automatically, and the new apps can then be installed.

With **Shopify Plus**, it takes 24 to 48 hours after the old integrations have been uninstalled before the Shopify Checkout update is complete.

In the meantime, you can install the "Pay with Card Offsite" app (steps 6 to 11) so that your customers can continue to shop with you using credit and debit cards:
